

# Day in the Life: Pathways and Possibilities in Operations

WEDNESDAY 6 AUGUST @ 5:00PM

Are you looking for a career that combines innovation, impact, and real-world problem solving? Join us for an immersive event designed for young people, especially women, who are curious about where a future in operations could take them.

## What to Expect

- Real stories from women working in operations: how they got started, what they love, and what challenges they've overcome.
- An interactive expo where you can ask questions, try out activities, and get a feel for what these careers are really like.
- Networking opportunities with professionals from leading companies who are passionate about supporting the next generation of talent.

You'll hear directly from inspiring women at companies like Sydney Water, Tassal Group, Linfox, Intellihub, George Weston Foods, BlueScope, and more — all ready to share their journeys and insights.

Whether you're in high school, studying at uni or TAFE, or exploring your next move, this event is your chance to discover exciting career paths you might not have considered yet.
